

FSA says "Summer Picnics Start On The Farm"

Draw a picture of all the different kinds of food you would eat at a summer picnic. Which plants and animals helped make that food? For example, milk and cheese start with cows; bread comes from grains, like wheat and rye, and potato salad contains lots of things grown on a farm. If you print just your first name and your age on the back and bring or send your picture to your local FSA Office you might see it published at www.fsa.usda.gov/fsakids.

Which plants and animals
helped to make the food
for your picnic?
